SCI Website Analysis

Web Log Analysis Yearly Report 2003

Report Range: 01/01/2003 00:00:00 - 12/31/2003 23:59:59

Table of Contents

General Statistics

This page provides a basic overview of the report. The Visits Over Time graph identifies the overall count of visits to your Web site. The General Statistics table provides statistics of the total activity for this Web site during the designated report period.

Visits Over Time

General Statistics	
Hits	
Successful Hits For Entire Site	3,334,310
Average Hits Per Day	9,135
Home Page Hits	30,075
Pages	
Page Views (Impressions)	263,651
Average Per Day	722
Dynamic Pages and Forms Views	33,605
Document Views	230,046
Visits	
Visits	182,628
Average Per Day	500
Average Visit Length	00:03:42
International Visits	20.95%
Visits of Unknown Origin	24.63%
Visits From Your Country: United States (US)	54.42%
Visitors	
Unique Visitors	86,934
Visitors Who Visited Once	70,469
Visitors Who Visited More Than Once	16,465

General Statistics - Help Card
?
Average Hits Per Day - Number of successful hits divided by the total number of days in the log file.

General Statistics - Help Card

Average Page Views Per Day - Number of page views divided by the total number of days in the log file.

Average Visit Length - Average of all non-zero length visits in the reporting period. A zero-length visit occurs when all hits in that visit are logged with the exact same time stamp.

Average Visits Per Day - Number of visits divided by the total number of days in the log file.

Document Views - Number of hits to pages that are considered documents--not dynamic pages or forms-- as defined by the system administrator.

Dynamic Pages and Forms Views - Number of hits to pages that are considered dynamic pages or forms. Reporting Center considers any URL containing options (with a question mark in the URL) a dynamic page. Any file with a POST command is considered a form.

Hits - Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

Home Page Hits - Number of times the home page (as defined in the profile) was viewed.

International Visits - Percentage of visitors who are defined as "international visitors" by the system administrator.

Page - Any document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form.

Page View (Impressions) - A hit to any file classified as a page. Contrast the value for "Page Views" with the value for "Successful Hits For Entire Site," which includes hits to files of every type.

Successful Hits For Entire Site - Number of successful hits including HTML pages, images, forms, scripts, and downloaded files.

Unique Visitors - The total number of unique visitors during the report period. A unique visitor is identified by their IP address, domain name, or cookie.

Visits - Number of visits to your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

Visits From Your Country - Percentage of visits from your country. The name of your country and the country code are shown. Your system administrator configures the selection for your country.

Visits of Unknown Origin - Percentage of visits where the visitor's domain name could not be determined or the country associated with the domain name could not be determined.

Visitors Who Visited More Than Once - Number of visitors who visited the site more than once during the reporting period.

Visitors Who Visited Once - Number of visitors who visited the site exactly once during the reporting period.

The General Statistics page provides an overview of your Web site's performance and visitor behavior, and can help you determine which chapters will be most valuable to you.

Page Views Over Time

This page helps you determine the bandwidth requirements of your Web site by tracking page views over the course of the report period.

Page Views Over Time
Page Views Over Time		
Time Interval	**Page Views**	**%**
Jan	18,176	6.89%
Feb	23,444	8.89%
Mar	21,314	8.08%
Apr	19,944	7.56%
May	20,713	7.86%
Jun	21,589	8.19%
Jul	17,651	6.69%
Aug	17,394	6.60%
Sep	23,727	9.00%
Oct	27,828	10.55%
Nov	26,805	10.17%
Dec	25,066	9.51%
Total	**263,651**	**100.00%**

Page Views Over Time - Help Card

?

Page - Any document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form.

Page View - A hit to any file classified as a page. Contrast page views with hits, which counts files of every type.

Time Interval - A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. All activity attributed to one time increment occurs between the listed

Page Views Over Time - Help Card

increment and the beginning of the next one. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.
% - Percentage of total page views that occurred during the specified time interval.

Periods of less activity can be considered good times for maintenance and content improvement.

Top Pages by Visits

This identifies the most popular Web pages on your site and shows you the number of visits for each, and displays the average length of time the page was viewed.

Top Pages by Visits - Help Card

?

Avg Time Viewed - Average length of time the specified page was viewed.

Pages - A document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form. If the page has a title, you will see the title of the page and the URL. Otherwise, you will see the URL and the words "Page Has No Title."

Visits - Number of visits to this page. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of the total visits in which the visitor viewed this page at least once.

♀

Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.

Top Visitors

This page identifies the IP address, domain name, or cookie of each visitor, and identifies the visitor's relative activity level on the site. If you use cookies to track visits, Reporting Center can differentiate between hits from different visitors with the same IP address.

Top Visitors - Help Card
❓

Top Visitors - Help Card

Visitor - The IP address, domain name, or cookie of the visitor.

Visits - Number of times the specified visitor visited your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of visits to your site by the specified visitor.
Consider the visitors who use the site most, and tailor your site to their interests and needs. If your site is an intranet, notice which employees use the site most, and find out what they like about it. You might also get feedback from those who use it the least and find out what they are looking for.

Note: If a visitor has a dynamic IP address, or if a group of visitors are behind a proxy server or firewall, this data might be misleading. In the case of a dynamic IP address, multiple IP addresses could be shown for a single visitor, and in the case of a firewall or proxy server, one IP address could be used by more than one visitor.

Top Browsers by Visits

This page identifies the most popular browsers used by visitors to your site. This information will only be displayed if your server is logging the browser/platform information.

Top Browsers by Visits

	Top Browsers by Visits

Top Browsers by Visits - Help Card

Top Browsers by Visits - Help Card

?

Browser - A program used to locate and view Web pages. These include Netscape, Mosaic, Microsoft Internet Explorer, and others.

Total - The total visits where there was sufficient information to identify the browser. This number may be less than the total visits overall.

Visits - Number of times a visitor with the specified browser came to your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

**%** - Percentage of total visits by visitors using the specified browser.

♀

Browser data can help you determine how to configure your site for optimal viewing.

Note: Any hits identified as originating from a spider (an automated program that searches the Internet) are not counted in this table. Also, if a browser does not identify itself in its request to the Web server, it will get counted on this page as an "Other."

Dynamic Pages & Forms by Visits

This page identifies the most popular dynamic pages and forms executed by the server.

	Dynamic Pages & Forms by Visits		
	Pages	**Visits**	**%**

Dynamic Pages & Forms by Visits - Help Card

?

Dynamic Pages and Forms - Dynamic pages are generated dynamically based on values selected by a visitor. They are generated with variables, and do not exist anywhere in a static, predictable form. Reporting Center considers any URL containing options (with a question mark in the URL) a dynamic page. Any file with a POST command is considered a form.

Pages - This column lists dynamic pages and forms, but not documents. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator.

Visits - Number of visits where the specified dynamic page or form was accessed. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.
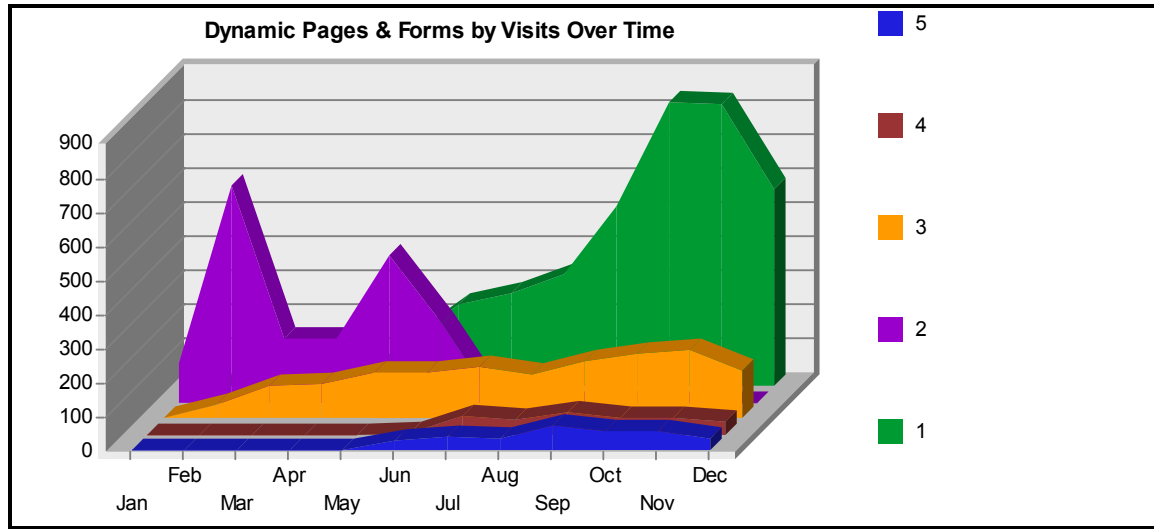

% - Of the total number of visits in which at least one dynamic page or form was accessed, this percentage of visits included this page.

💡

This page can be used to track the activity of dynamic pages a forms separately from static pages (documents).

Dynamic Pages & Forms by Visits Over Time

This page identifies the most popular dynamic pages and forms executed by the server.

10.	Pacific Islands	304	0.17%
	Total	**182,628**	**100.00%**

Top Geographic Regions - Help Card

Geographic Regions - The geographic part of the world where visitors to your web site are located. "Region Unspecified" represents visitors whose geographic region could not be determined. Two methods exist for identifying the location of each visitor:

WebTrends GeoTrends Database - If GeoTrends is turned on for this profile, the region is determined by looking up the visitor's IP address in this database.

Domain Name - The region can be determined by the domain name. The domain name can be identified if it was logged by the web server or, if it is defined in the Internet Domain Name System then it may be found using DNS resolution.

Total - The total visits.

Visits - Number of visits from this geographic region. A visit is a series of actions that begins when a

Top Geographic Regions - Help Card

visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of total visits that were from this geographic region.

This information can help you meet the needs of your target audience as well as discover new audiences. Consider how you can make the content comprehensive and relevant to an international audience.

Note: Use this information carefully because it is based on Internet registration, and may not always be an accurate identifier of the visitor's actual location.

Top Countries

This page identifies the top countries of the visitors to your site.
Top Countries

Top Countries			
	Countries	**Visits**	**%**

Top Domain Names by Visits - Help Card

Top Domain Names by Visits - Help Card

?

Domain Name - The text name corresponding to the IP address of a computer on the Internet. For example, netiq.com is a domain name. The domain name can be determined if it was logged by the web server or, if it is defined in the Internet Domain Name System then it may be found using DNS resolution. Otherwise, the domain name is not known and this table shows the IP address.

The domain name shown is the second-level domain name, such as netiq.com. If the top-level domain name is a country code, then this shows the third-level domain name, such as anycompany.com.au. For example, all visitors from sales.netiq.com, us.sales.netiq.com, and service.net.iq.com are combined in the statistics for netiq.com.

Click on the domain name to generate an Internet whois lookup.

Total - The total for all visits.

Visits - Number of visits to your site from this domain name. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.
% - Percentage of the total visits that were from this domain name or IP address.

♀

Use this information when you are interested in high-level domain names of visitors to your web site.

Top-Level Domain Types by Visits

This page provides a breakdown of top-level domain types.

Top-Level Domain Types by Visits

Top-Level Domain Types by Visits		Visits	%
	Top-Level Domain Types	**Visits**	**%**
1.	Commercial	58,644	53.03%
2.	Network	32,743	29.61%
3.	Education	16,166	14.62%
4.	Government	1,633	1.48%
5.	Organization	905	0.82%
6.	Military	447	0.40%
7.	ARPANET	46	0.04%
8.	International	10	0.01%
	Total	**110,594**	**100.00%**

Top-Level Domain Types by Visits - Help Card

?

Top-Level Domain - The suffix of a domain name. A top-level domain can be based on the type of organization (.com, .edu, .museum, .name, etc) or it can be a country code (.uk, .de, .jp, .us, etc.). The top-level domain can be used to identify the type of web site. The following is a partial list of how this report categorizes top-level domains:

ARPANET: .arpa

Commercial: .com .co .com.[country code] .co.[country code] .firm.co .firm.ve .ltd.uk

Education: .edu .edu.[country-code] .ed.[country code] .ac.[country code]

.school.[country code] .k12.[country code] .re.kr .sch.uk .edunet.tn

International: .int .int.co .int.ve .intl.tn

Government: .gov .gov.[country code] .gove.[country code] .go.[country code]

Top-Level Domain Types by Visits - Help Card

Military: .mil .mil.[country code]

Network: .net .ad.jp .ne.kr .net.[country code]

Organization: .org .or .org.[country code] .or.[country code]

Total - The total visits where there was sufficient information to identify the top-level domain. This number may be less than the total visits overall.

Visits - Number of visits to your site from the specified top-level domain. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of total visits from sites in the specified top-level domain. The percentages refer to the total number of visits for which the domain name can be determined. Some IP addresses can not be resolved to a domain name.

Consider which types of organizations are interested in your site, and consider how you can interest other types of organizations.

Note: This information can be displayed only if reverse DNS lookups have been performed. Even when DNS lookups are performed, some IP addresses can not be resolved to a domain name.

Summary of Activity for Report Period

This page summarizes general server activity.

Summary of Activity for Report Period	
Average Number of Visitors per day on Weekdays	547
Average Number of Hits per day on Weekdays	10,505
Average Number of Visitors per Weekend	761
Average Number of Hits per Weekend	11,393
Most Active Day of the Week	Thu
Least Active Day of the Week	Sat
Most Active Date	February 06, 2003
Number of Hits on Most Active Date	64,681
Least Active Date	April 29, 2003
Number of Hits on Least Active Date	9
Most Active Hour of the Day	09:00-09:59
Least Active Hour of the Day	23:00-23:59

Summary of Activity for Report Period - Help Card

Average Number of Hits (per day on weekdays) - The average number of hits for each individual day of the week.

Average Number of Hits (per weekend) - The average number of hits for both Saturdays and Sundays combined.

Average Number of Visitors (per day on weekdays) - The average number of visits for each individual day of the week.

Average Number of Visitors (per weekend) - The average number of visits for both Saturdays and Sundays combined.

Least Active Date - The least active date in the report period.

Least Active Day of the Week - If the report period is for one week or less, the Least Active Day of the Week will tell you which specific day was least active during that week. If the report period is for more than one week, the Least Active Day of the Week will tell you which day of the week that has the smallest amount of activity on average.

Least Active Hour of the Day - The least active hour of the day after activity for all hours is added up. This is not an average.

Most Active Date - The most active date in the report period.

Most Active Day of the Week - If the report period is for one week or less, the Most Active Day of the Week will tell you which specific day was most active during that week. If the report period is for more than one week, the Most Active Day of the Week will tell you which day of the week that has the largest amount of activity on average.

Most Active Hour of the Day - The most active hour of the day after activity for all hours is added up. This is not an average.

This page is useful for determining the best day of the week to perform system maintenance.

Technical Statistics and Analysis

This page shows the reliability of your Web site. The table shows the total number of hits for the site, how many hits were successful, how many hits failed, and the percentage of hits that failed.

Technical Statistics and Analysis	
Total Hits	3,407,679
Successful Hits	3,334,310
Failed Hits	73,369
Failed Hits as Percent	2.15%
Cached Hits	414,120
Cached Hits as Percent	12.15%

Technical Statistics and Analysis - Help Card
?   **Cached Hits** - Hits where the page was found in the cache of the browser, so the server did not need to transfer the file.   **Cached Hits as Percent** - Percentage of hits that were cached compared with the total number of hits.   **Failed Hits** - Number of hits where a server or client error occurred.   **Failed Hits as Percent** - Percentage of hits where a server or client error occurred.   **Hits** - Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.   **Successful Hits** - Number of hits without a server or client error.   **Total Hits** - Number of successful hits plus failed hits.   ♀   Use this information for a bird's-eye view of the reliability of your Web site. Many major problems can be revealed here.

Dynamic Pages & Forms Errors

This page shows the number of successful form submissions and dynamic pages served compared to the number that failed.
Dynamic Pages & Forms Errors			
	Pages	**Hits**	**%**
1.	Successful Dynamic Pages & Forms	33,605	88.11%
2.	Failed Dynamic Pages & Forms	4,534	11.89%
	Total	**38,139**	**100.00%**

Dynamic Pages & Forms Errors - Help Card

Hits - Number of hits to the specified page. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

Pages - This column lists dynamic pages and forms, but not documents. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form.
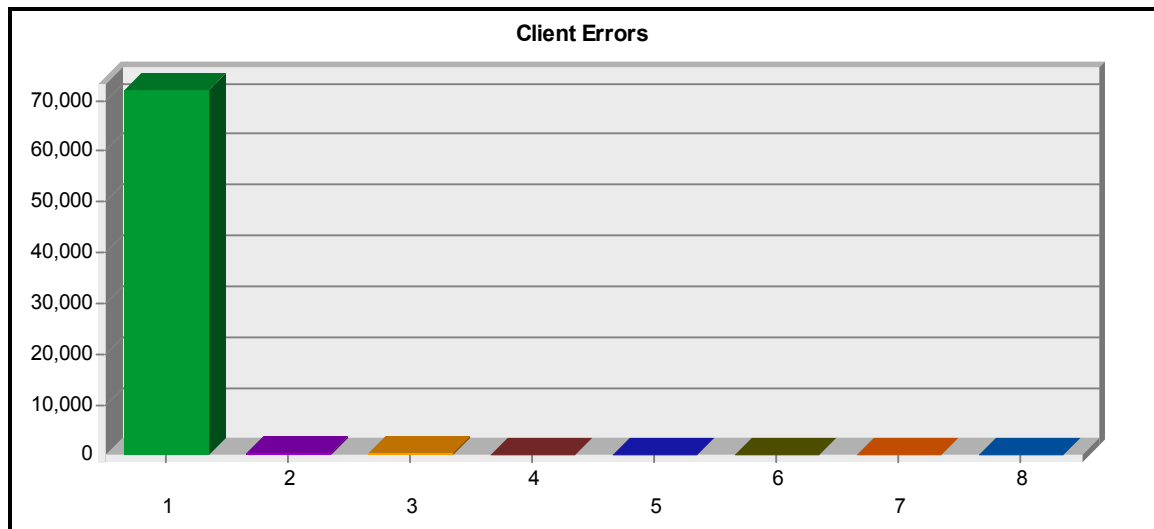

% - Percentage of hits to the specified page that were successful.

This page helps determine the reliability of your site.

Client Errors

This page identifies the error codes from the browsers accessing your server.

Client Errors

	HTTP Status Codes	Hits	%
1.	404 Not Found	72,177	98.47%
2.	400 Bad Request	552	0.75%
3.	403 Forbidden	533	0.73%
4.	401 Unauthorized	15	0.02%
5.	408 Request Time-out	8	0.01%
6.	406 Not Acceptable	7	0.01%
7.	405 Method Not Allowed	3	0.00%
8.	416 Incomplete / Undefined	2	0.00%
	Total	**73,297**	**100.00%**

Client Errors - Help Card

?

Client Errors - An error caused by a problem on your visitor's end of the Web site connection. The server is not responsible for client errors.

Hits - Number of failed hits that returned this status code.

HTTP Status Codes - The status code for the specific error that occurred.
% - Percentage of total failed hits that returned this status code.

💡

Use this page to determine what maintenance is necessary.

File Not Found Errors

This page identifies files that returned "404 - Not Found" or "410 - Gone" errors from your server.

File Not Found Errors

File Not Found Errors

File Not Found Errors - Help Card

Hits - Number of times a request for this file returned a "404 - Not Found" error or a "410 - Gone" error from your server.

Files - This column lists the file that could not be found and the URL of the referrer (if known).

% - Percentage of the total 404 and 410 errors that were for this file.

Check the links to all pages and files listed in this table. The files were either moved or they no longer exist, and the links are no longer successful.

Server Errors

This page lists the errors which occurred on the server.
Server Errors			
	HTTP Status Codes	Hits	%
1.	500 Internal Server Error	66	91.67%
2.	501 Not Implemented	6	8.33%
	Total	**72**	**100.00%**

Server Errors - Help Card

Hits - Number of failed hits of the type specified in the "Pages" column. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

HTTP Status Codes - The specific HTTP error that occurred.

**%** - Percentage of failed hits that were of the specified type.

Use this page to determine what maintenance is necessary.

Top Search Engines

The first table identifies which search engines referred visitors to your site most often. Totals in this table represent the number of searches, whether they contain one or several keywords.

The second table identifies the main keywords for each search engine.
Top Search Engines

	Engines	Referrals	%
1.	google	88,210	89.98%

Top Browsers by Visits - Help Card

Top Browsers by Visits - Help Card

?

Browser - A program used to locate and view Web pages. These include Netscape, Mosaic, Microsoft Internet Explorer, and others.

Total - The total visits where there was sufficient information to identify the browser. This number may be less than the total visits overall.

Visits - Number of times a visitor with the specified browser came to your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

**%** - Percentage of total visits by visitors using the specified browser.

♀

Browser data can help you determine how to configure your site for optimal viewing.

Note: Any hits identified as originating from a spider (an automated program that searches the Internet) are not counted in this table. Also, if a browser does not identify itself in its request to the Web server, it will get counted on this page as an "Other."

Top Platforms by Visits

This page identifies the operating systems most used by the visitors to the site. This information will only be displayed if your server is logging the browser/platform information.
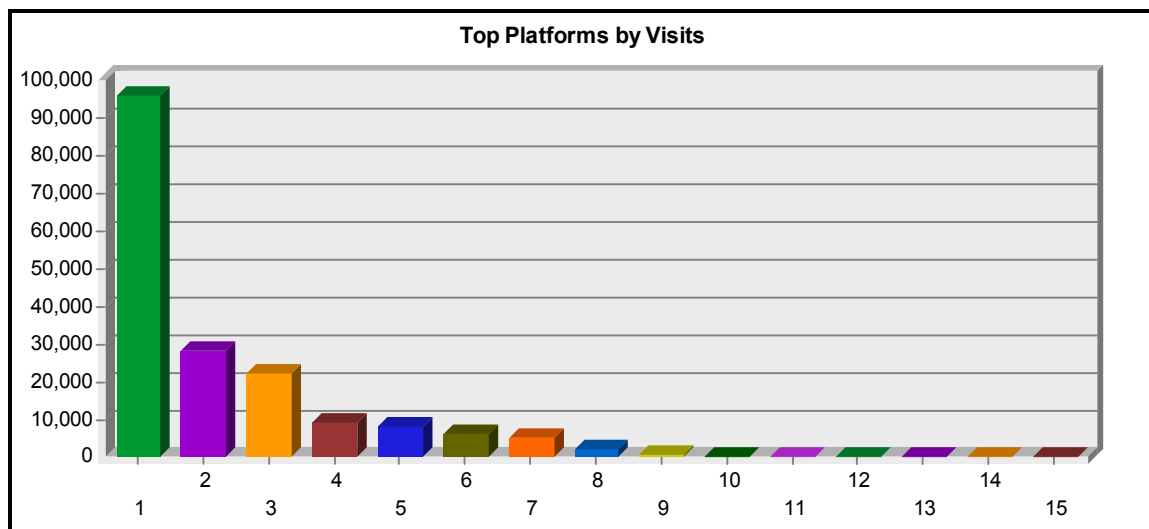

Top Platforms by Visits

	Platform	Visits	%
1.	Windows 2000	96,094	53.64%
2.	Windows 98	28,542	15.93%
3.	Others	22,129	12.35%
4.	Windows ME	9,476	5.29%
5.	Linux	8,106	4.53%
6.	Macintosh PowerPC	6,229	3.48%
7.	Windows NT	5,052	2.82%
8.	Windows 95	2,235	1.25%
9.	SunOS	955	0.53%
10.	Windows Win32s	273	0.15%
11.	Hewlett Packard Unix (HP9000)	22	0.01%
