Corview - Cardiac MRI Segmentation and Analysis

PURPOSE:
- Rapidly segment cardiac anatomy from cardiac MRIs
- Analyze image features for triage of patient’s disease process
- Visualizations to guide clinical procedures

DATA:
- Late gadolinium enhanced cardiac MRI

USERS/COMMUNITY:
- Cardiac electrophysiologists of the University of Utah Cardiac Arrhythmia Research and Management (CARMA) Center
- DECAAF (15 Center, multi-national study) partners

STATUS:
- Fully commercialized, FDA approved, used in research and clinical use

The development of Corview was funded by the CARMA Center and Merisight Inc.
