SCIRun 5 Cardiac Forward/Inverse Toolkit

**PURPOSE:**
- Calculating forward and inverse problems in the cardiac domain
- Set up, compute, visualize and analyze solutions

**DATA:**
- Image-based models from volumetric data of hearts and torsos

**USERS/COMMUNITY:**
- Experimental and clinical cardiologists
- Computational cardiologists / engineers

**STATUS:**
- Beta-released

Pipeline:
- Image & Data Acquisition
- Image Processing
- Geometry Processing
- Modeling, Simulation & Validation
- Visualization
- Lab/Clinic
