Monthly Report December 2007

12/11/2007 00:00:00 - 12/31/2007 23:59:59

General Statistics

Help

This page provides a basic overview of the report. The Visits Over Time graph identifies the overall count of visits to your Web site. The General Statistics table provides statistics of the total activity for this Web site during the designated report period.

General Statistics

Successful Hits For Entire Site	2,728
Average Hits Per Day	129
Home Page Hits	N/A
Pages	
Page Views (Impressions)	2,655
Average Per Day	126
Dynamic Pages and Forms Views	183
Document Views	2,472
Visits	
Visits	2,182
Average Per Day	103
Average Visit Length	00:05:32
International Visits	9.58%
Visits of Unknown Origin	21.49%
Visits From Your Country: United States (US)	68.93%
Visitors	
Unique Visitors	630
Visitors Who Visited Once	453
Visitors Who Visited More Than Once	177

General Statistics - Help Card

Average Hits Per Day - Number of successful hits divided by the total number of days in the log file.

Average Page Views Per Day - Number of page views divided by the total number of days in the log file.

Average Visit Length - Average of all non-zero length visits in the reporting period. A zero-length visit occurs when all hits in that visit are logged with the exact same time stamp.

Average Visits Per Day - Number of visits divided by the total number of days in the log file.

Document Views - Number of hits to pages that are considered documents--not dynamic pages or forms--as defined by the system administrator.

Dynamic Pages and Forms Views - Number of hits to pages that are considered dynamic pages or forms. Reporting Center considers any URL containing options (with a question mark in the URL) a dynamic page. Any file with a POST command is considered a form.

Hits - Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

Home Page Hits - Number of times the home page (as defined in the profile) was viewed.

International Visitors - Percentage of visitors who are defined as "international visitors" by the system administrator.

Page - Any document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form.

Page View (Impressions) - A hit to any file classified as a page. Contrast the value for "Page Views" with the value for "Successful Hits For Entire Site," which includes hits to files of every type.

Successful Hits For Entire Site - Number of successful hits including HTML pages, images, forms, scripts, and downloaded files.

Unique Visitors - The total number of unique visitors during the report period. A unique visitor is identified by their IP address, domain name, or cookie.

Visits - Number of visits to your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

Visits From Your Country - Percentage of visits from your country. The name of your country and the country code are shown. Your system administrator configures the selection for your country.

Visits of Unknown Origin - Percentage of visits where the visitor's domain name could not be determined or the country associated with the domain name could not be determined.

Visitors Who Visited More Than Once - Number of visitors who visited the site more than once during the reporting period.

Visitors Who Visited Once - Number of visitors who visited the site exactly once during the reporting period.

--

The General Statistics page provides an overview of your Web site's performance and visitor behavior, and can help you determine which chapters will be most valuable to you.

Top Visitors - Help Card

Visitor - The IP address, domain name, or cookie of the visitor.

Visits - Number of times the specified visitor visited your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of visits to your site by the specified visitor.

Consider the visitors who use the site most, and tailor your site to their interests and needs. If your site is an intranet, notice which employees use the site most, and find out what they like about it. You might also get feedback from those who use it the least and find out what they are looking for.

Note: If a visitor has a dynamic IP address, or if a group of visitors are behind a proxy server or firewall, this data might be misleading. In the case of a dynamic IP address, multiple IP addresses could be shown for a single visitor, and in the case of a firewall or proxy server, one IP address could be used by more than one visitor.

Top Referring Sites by Visits - Help Card

Referring Site - A Web site which refers a visitor to your site by linking to it.

Site - Specific referring site being analyzed.

Visits - Number of times the specified site referred visitors to your site.

% - Percentage of referrals that came from the specified site.

--
You can use this page to determine which sites are referring the most visitors to your site. This can help when considering the most effective ways and places to attract visitors.

Top Pages by Visits - Help Card

Avg Time Viewed - Average length of time the specified page was viewed.

Pages - A document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a document. These settings can be changed by the Reporting Center system administrator. Any URL containing a question mark is considered a dynamic page. Any file with a POST command is considered a form. If the page has a title, you will see the title of the page and the URL. Otherwise, you will see the URL and the words "Page Has No Title."

Visits - Number of visits to this page. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of the total visits in which the visitor viewed this page at least once.

Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.

Top Geographic Regions

Help

This page identifies the top geographic regions of the visitors to your site.

	Geographic Regions	Visits	%
1.	North America	1,507	69.07%
2.	Region Unspecified	469	21.49%
3.	Western Europe	146	6.69%
4.	Asia	25	1.15%
5.	Australia (AU)	16	0.73%
6.	South America	7	0.32%
7.	Northern Europe	7	0.32%
8.	Eastern Europe	3	0.14%
9.	Pacific Islands	1	0.05%
10.	Caribbean Islands	1	0.05%
Total		2,182	100.00%

Top Geographic Regions - Help Card

? **Geographic Regions** - The geographic part of the world where visitors to your web site are located. "Region Unspecified" represents visitors whose geographic region could not be determined. Two methods exist for identifying the location of each visitor:

WebTrends GeoTrends Database - If GeoTrends is turned on for this profile, the region is determined by looking up the visitor's IP address in this database.

Domain Name - The region can be determined by the domain name. The domain name can be identified if it was logged by the web server or, if it is defined in the Internet Domain Name System then it may be found using DNS resolution.

Total - The total visits.

Visits - Number of visits from this geographic region. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle

beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

% - Percentage of total visits that were from this geographic region.

--
This information can help you meet the needs of your target audience as well as discover new audiences. Consider how you can make the content comprehensive and relevant to an international audience.

Note: Use this information carefully because it is based on Internet registration, and may not always be an accurate identifier of the visitor's actual location.
